TO: EVMP Authors

FROM: Jim Plummer

SUBJECT: Short statements "About the Authors"

Energy Vulnerability will include a section at the back containing short blurbs about each of us. Please immediately send me a short statement about yourself. This is the only bottleneck holding up production of the book.

Enclosed are the analogous pages from Energy and Security, which may give you an indication about proper length, style, and elements for inclusion.

I'm writing a Preface now, and will send the draft to Ballinger and each of you simultaneously.

ABOUT THE CONTRIBUTORS

Alvin L. Alm is a Research Fellow of the Energy and Environmental Policy Center, a participant in the Energy and Security Research Project, and Program Director at the Aspen Institute for Humanistic Studies, Committee on Energy. He maintains a key interest in the development of new policy capabilities and policy responses for meeting the problems of energy emergencies. Mr. Alm's professional experience includes positions as the Assistant Secretary for Policy and Evaluation of the Department of Energy, Assistant Administrator for Planning and Management of the Environmental Protection Agency, and Staff Director of the Council on Environmental Quality.

E. William Colglazier is a former research physicist who now works on public policy issues connected with science and technology. He is a Research Fellow at the Center for Science and International Affairs at Harvard University and Associate Director of the Aspen Institute Program in Science, Technology and Humanism. He received his Ph.D. from the California Institute of Technology and has worked at the Stanford Linear Acceleration Center and the Institute for Advanced Study in Princeton. In 1976–77, he was a Congressional Science Fellow sponsored by the American Association for the Advancement of Science.

Marshall I. Goldman is Associate Director of the Russian Research Center, Harvard University and Professor of Economics at Wellesley College. He is the author of *The Enigma of Soviet Petroleum: Half Empty or Half Full* (1980), and *Detente and Dollars: Doing Business with the Soviets* (1975).

Fen Hampson is a doctoral candidate in the Department of Government, Harvard University. He is a graduate of the University of Toronto and the London School of Economics. His current interests are energy policies in Canada and Mexico.

William W. Hogan is a Professor of Political Economy and Director of the Energy and Environmental Policy Center at Harvard University's John F. Kennedy School of Government. Prior to joining the John F. Kennedy School in 1978, he was a member of the Departments of Engineering-Economic Systems and Operations Research at Stanford University. While at Stanford, he founded the Energy Modeling Forum and served as its first Executive Director, coordinating comparative analyses of the use of energy models as applied to policy analysis in the Federal Energy Administration, first as the Director of the Office of Quantitative Methods and subsequently as the Deputy Assistant Administrator for Data and Analysis (1974–1976). He is the Energy/Environment editor of *Operations Research*, and is involved in various research activities in the development and application of energy and environmental policy models.

Barbara Kates-Garnick is a researcher at the Center for Science and International Affairs at Harvard University and a Ph.D. candidate at the Fletcher School of Law and Diplomacy at Tufts University. Her recent work examines the prospects for a future international energy regime from the perspective of the industrial oil-consuming nations. She has served in local government and has been a consultant to the Department of Energy and several state energy offices.

Geoffrey Kemp is an Associate Professor of International Politics at the Fletcher School of Law and Diplomacy at Tufts University. He was born in England and was educated at Oxford University. He received his Ph.D. in Political Science from the Massachusetts Institute of Technology. He has written extensively on arms transfers, defense policy, and strategy for the newly industrialized countries, and on Middle East military affairs.

Linda B. Miller is Professor of Political Science at Wellesley College and Adjunct Research Fellow, Center for Science and International Affairs, Harvard University. She is the author of *World Order and Total Disorder* (1967) and *Dynamics of World Politics* (1968) and has written extensively on American foreign policy, European politics, international organization, and energy problems for a variety of U.S., British, and European journals. She has taught and done research at Harvard, Princeton, and Columbia University and held fellowships at the Council on Foreign Relations and the Rockefeller Foundation.

Kevin J. Middlebrook is an associate of the Center for International Affairs at Harvard University. In January 1981, he will join the Department of Political Science, Indiana University–Bloomington. His research interests include the domestic and foreign policies of Mexico and other Latin American nations.

Thomas L. Neff is Principal Research Scientist and Manager of the International Energy Studies Program at MIT's Energy Laboratory. His primary research interests are in the economic and political dimensions of international energy trade—with special emphasis on oil and nuclear fuels—and in the financial and institutional impacts of the massive wealth transfers associated with energy trade. He has served as an expert advisor to the State Department, the Arms Control and Disarmament Agency, and the Office of Science and Technology Policy.

Gary Samore is an associate of the Center for Science and International Affairs at Harvard University, where he analyzes internal, regional, and international threats to Persian Gulf oil and appropriate American responses to these threats. He is also a Teaching Fellow and Ph.D. candidate in the Department of Government at Harvard University. His recent work examines the changing patterns of American interests and strategies in the Persian Gulf.

Philip K. Verleger is a senior research scholar at the School of Management, Yale University. He has served as a senior staff economist on the President's Council of Economic Advisers and in the capacity of Special Assistant for Energy Matters at the U.S. Treasury.
